Document revision level

The document corresponds to the version/revision level effective at the time of system delivery. Revisions to hardcopy documentation are not automatically distributed.

Please contact your local Siemens office to order current revision levels.

Disclaimer

The installation and service of equipment described herein is to be performed by qualified personnel who are employed by Siemens or one of its affiliates or who are otherwise authorized by Siemens or one of its affiliates to provide such services.

Assemblers and other persons who are not employed by or otherwise directly affiliated with or authorized by Siemens or one of its affiliates are directed to contact one of the local offices of Siemens or one of its affiliates before attempting installation or service procedures.

General

Disposing of hazardous materials is important when scrapping the system / equipment as well as for replacing particular items while the system is in use.

The product-related list of hazardous materials in these instructions gives an overview of the components and assemblies requiring disposal. The disposal information and graphics will assist you in locating these hazardous materials in the system.

Disposal list

- The items in the following table are to be disposed of through an authorized waste disposal company.

Component/ Assembly	Location		Hazard/ Hazardous Material	Qty
X-ray tube assembly	C-arm, below	1/Fig.1	Lead Oil X-ray tube implosion	1
Collimator	C-arm, below in the X-ray tube assy	2/Fig.1	Lead	1
Image intensifier 9"	I.I. housing, lead-lined housing	3/Fig.1	Lead Image intensifier tube implosion	1
Image intensifier 9"	Cap, lead-lined C-arm	4/Fig.1	Lead Image intensifier tube implosion	1
Counterbalancing	C-arm, lead mounted on C-arm	5/Fig.1	Lead	1
C-arm	C-arm kpl.	6/Fig.1	Carbon fiber laminate	1
Monitor(s)	Monitor trolley, above	7/Fig.2	Picture tube implosion	1 / 2
MULTISPOT optional	In the monitor trolley	8/Fig.2	Picture tube implosion inside the MULTISPOT	1
Battery	MEMOSKOP C / C-E in the monitor trolley	9 + 10/ Fig.2	Lithium	2
Counterbalancing	Basic unit	11 Fig.2	Lead	1
Battery	3D reconstruction PC	12 Fig.3+4	Lithium	1
